How basketball is played

Sports page about how sports are played (a breakdown of sports)*

Page about what shoes can benefit your daily life in different sports*

Who - People of all ages who are interested in learning how to play a new sport.

What - They'll learn how to play different sports.

Why - To teach people how to play more sports.

How - They will have learned how to play a sport or multiple sports.

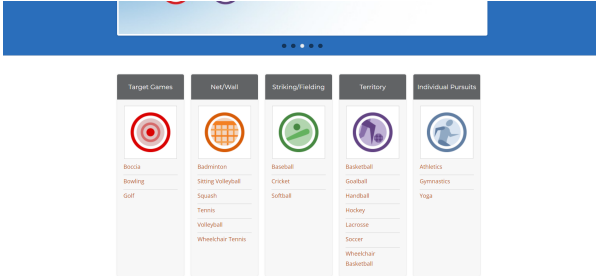

Statement of intent

I want to make a website to help people learn how to play multiple sports.

This website can be used by anyone from any age to help them gather knowledge on different sports and where they originated from and how they can play it. The website will have information about the different sports, where it originated from, how many years it's been played for, the rules of all the different sports and what benefits do the sports have (calories burnt etc.)

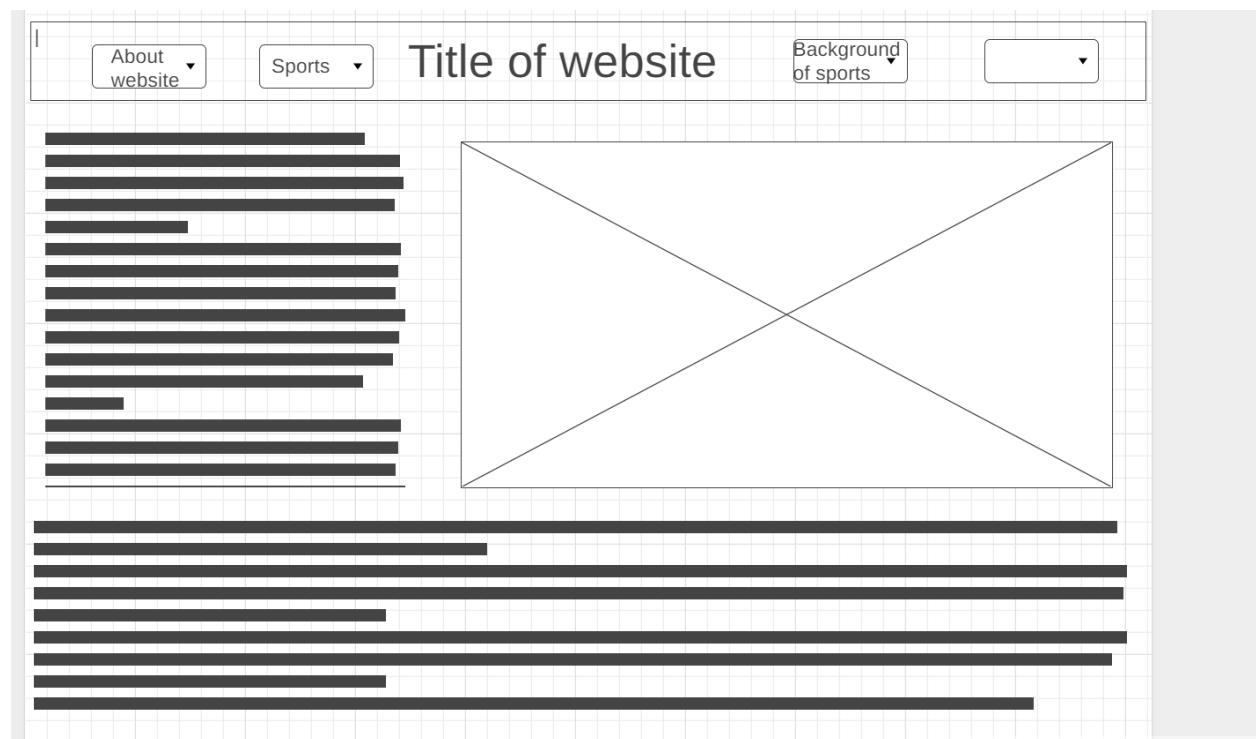

My website will include buttons, different pages, links, images, videos and writing. This is to help users understand the information easier.

After people visit the website I hope they would have been able to learn about a new sport and how to play it. People should gain knowledge about different sports and hopefully be able to spread the information to other people.

 <p>playsport.net</p>	<ul style="list-style-type: none">• Has buttons to help users interact with the website.• Simple interface to help people understand and find what they need easier.• There are images to help users understand the content easier.

 <h2>Basketball Rules</h2> <p>Basketball dates back as far as 1891 and since then has evolved into a sport played around the world. Many countries have adopted the game such as Russia, Great Britain, Germany, Spain and parts of Asia, but it is America where the biggest and most lucrative league in the world lives: the NBA (National Basketball Association).</p> <p>Object of the Game</p> <p>The object of basketball is to throw the ball (basketball) into a hoop to score points. The game is played out on a rectangular court and depending on which section of court you successfully throw a ball into the basket will depend on how many points are scored. The ball can be moved around the by dribbling or passing the ball. At the end of the game the</p> <p>rulesofsport.com</p>  <p><small>Photo credit: Keith Allison (Source)</small></p> <ul style="list-style-type: none"> AMERICAN FOOTBALL ARCHERY ARM WRESTLING ATHLETICS AUSSIE RULES FOOTBALL BADMINTON BAR BILLIARDS BASEBALL BASKETBALL BEACH VOLLEYBALL BEER PONG BILIARD 	<ul style="list-style-type: none"> • This website has lots of information and goes into great detail on how to play basketball • Website has quick links and shows how to play other sports too •

UX persona:

- a.) As a student from Australia I want to teach people and help them learn how to play new sports
- b.) I want to teach people how to play new sports
- c.) So that I can improve my teaching skills and get a broader understanding of sports.

My Favicon:

UAT test plan for Learn2Play:

Our goal for Learn2Play is to teach people how to play sports. We're hoping to accomplish people learning how to play different sports by teaching them rules and different strategies to help succeed in the game.

We will measure success by getting feedback from people who have used our website and have successfully learned how to play a sport using our information.

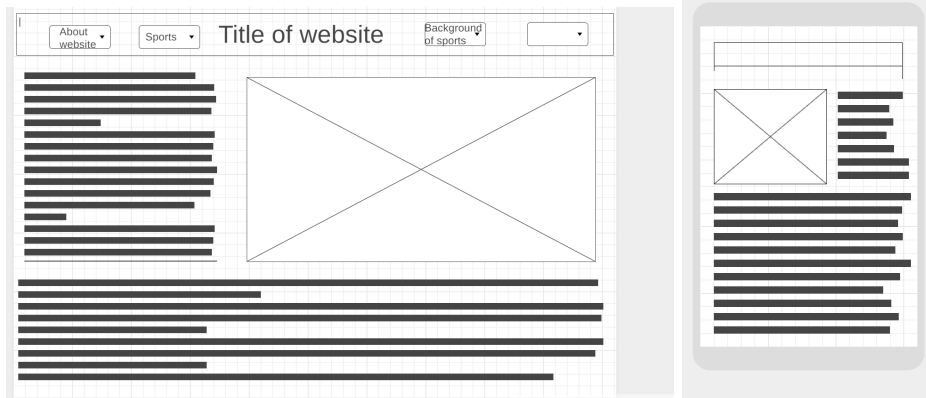

Our main problem is people not knowing how to play sports and to create a website that can be used to assist people with learning a new sport.

For our UAT test, we plan to:

Create a website that has a user friendly interface.

A website that can successfully teach people to play sports.

Get feedback from users and ask for opinions and suggestions.

These are the wireframes for our website, on the left is our desktop view and on the right is the mobile view. On the website there will be an image of the sport and paragraphs about rules and how to play next to the image. On the top of the page there is the title of the web page and multiple drop downs which link into different sports and other aspects of our website.

Software recommendations:

For windows users:

- 4gb ram
- 2nd generation Core i5 (2 GHz+), 3rd/4th generation Core i5 processor, or equivalent
- Windows 7 or later

For Mac users

- Macbook Pro 2011 or newer, Macbook Air 2012 or newer
- OS X 10.9 or later

Pass/Fail Criteria

If someone successfully learns how to play a new sport using our website with no issues and all buttons and features on our website work, that would be considered a pass.

If people didn't learn anything about a sport and couldn't learn how to play a sport using our website and the features such as buttons and dropdowns didn't work, that would be considered a failure.
